

AUTO EXPO 2020 – COMPONENTS

Time for 'TECHNOVATION'

The 15th edition of Auto Expo 2020 – Components Show, which is now Asia's largest automotive show, jointly organised by Automotive Component Manufacturers Association of India (ACMA), Confederation of Indian Industry (CII) and Society of Indian Automobile Manufacturers (SIAM) is all set to welcome the Indian and global auto fraternity from February 6 to 9, 2020 at Pragati Maidan, New Delhi.

Despite the prolonged slow-down the auto industry is going through, the current edition of the Components Show has seen a 45 per cent increase in size of participation over the last edition, spread across an area of over 60,000 sq. m. covering both the newly-constructed halls (Halls A3 to A5) and the old halls (Halls 7 to 11) at Pragati Maidan. The show has attracted participation of around 1,500 companies from 20 countries.

This year, the event is themed 'Technovation – Discover Innovations for Future' with a number of focused pavilions and parallel events. The show has also attracted the largest-ever overseas participation of over 400 compa-

nies from 20 countries, with seven country pavilions.

Around 400 companies are launching / displaying over 1,200 new products and technologies, all of which align with the auto industry's goal of making vehicles

smarter and more sustainable for future mobility.

Apart from the larger suppliers, Auto Expo 2020 also has a large presence of SMEs in the component manufacturing space, showcasing India's potential as a

preferred outsourcing destination for component manufacturing for the global market. With participation of major leading players of the industry, the exhibition is aimed at helping and facilitating the SME sector to become the sustainable components manufacturing segment in India.

The following parallel events are scheduled during the Components Show: Modern Automotive Technologies for Future of Mobility in India, G7 CEOs Meet, SIAM EC Members & Select OEMs Meet, Matchmaking – Global SME Technology Partnership Meet and SIAM Sourcing Group Meeting.

The above forums are expected to effectively engage the business community to conduct meaningful discussions and initiate dialogues for future businesses, with an objective to bring the best technologies to the Indian automotive manufacturing sector.

The Inaugural Ceremony of the 15th Auto Expo 2020 – Components Show will be held on February 6 (Thursday) at 1100 hrs at Hall No.A4, Pragati Maidan, New Delhi, in the presence of Shri. Arjun Ram Meghwal, Minister of State for Parliamentary Affairs & Heavy Industries and Public Enterprises, Government of India.

Get ready for global attention!

Pre-registered Business Visitors from the following countries are expected to visit Auto Expo 2020 - Components: **Algeria, Australia, Austria, Bangladesh, Canada, Colombia, Estonia, Ethiopia, France, Germany, Ghana, Hong Kong, Indonesia, Iran, Israel, Italy, Kenya, Kuwait, Malaysia, Mexico, Nepal, Netherlands, Nigeria, Oman, Poland, Qatar, Romania, Russia, Singapore, South Africa, Sri Lanka, Sudan, Thailand, Turkey, Uganda, UAE, USA, Zimbabwe.**

Focused Pavilions:

ACMA Innovation, ACMA Safer Drives, Bearings, Garage Equipment, Future Technologies

Country Pavilions:

Canada, Germany, Japan, South Korea, Turkey, UK, China

1500 exhibitors from 20 countries

Over 100,000 visitors from around 70 countries expected

Online registration for B2B meetings

Mobile App: 'Auto Expo 2020 Components Show'

Health Advisory

All Chinese companies scheduled to participate at Auto Expo 2020 – Components – at Pragati Maidan, New Delhi, from February 6 to 9, have informed the organisers that travellers from China scheduled to attend the components show are unable to travel to India due to the prevailing conditions in China.

However, around 30 companies from the Chinese Group have confirmed that their stand at Auto Expo 2020 – Components would be managed by their Indian counterparts in their absence.

As travel of Chinese nationals to India has now been stopped, the event organizers do not expect visitors and delegates from China at the fair. Despite no direct Coronavirus threat at Auto Expo 2020, the organizers are taking adequate measures to make people aware of symptoms and take prevention and containment actions.

“Shaping the future trajectory of the auto industry”

“This year’s theme, ‘Technovation: Discover Innovations for Future’ has been adopted to steer the industry forward, instil a positive sentiment, showcase the best technological prowess while providing more opportunities for growth. Besides showcasing traditional components, the expo will give companies an opportunity to highlight their preparedness for future mobility. We are therefore looking forward to this edition which will be monumental in shaping the future trajectory of the industry by focussing on our collective strength and capabilities.”

– **Deepak Jain, ACMA President, and CMD, Lumax Industries**

“We all are excited at the prospects of Auto Expo 2020 - Components as it brings the spotlight on advanced technologies in the auto component space. Despite the fact that the industry is facing challenges due to a prolonged slowdown, we are glad that we have 25 per cent more exhibitors than the previous edition. It clearly reflects the resilience and determination of the auto components industry. Our members recognise the importance of this platform as it holds the key to future opportunities and the industry’s brand equity.”

– **Vinnie Mehta, Director General, ACMA**

BorgWarner to showcase innovations for combustion, hybrid and electric vehicles

As a global leader in clean and efficient technology solutions for all kinds of propulsion systems, BorgWarner is looking forward to the Indian auto industry’s transition to BS-VI this April and also the strong e-mobility drive in the country. Christopher J. Lanker, Vice President & General Manager, Emissions, Thermal and Turbo Systems, Asia Pacific, BorgWarner, tells us about his company’s presence at Auto Expo 2020 – Components and why BorgWarner sees a bright future ahead for its India biz.

Focus at Auto Expo 2020

As India’s automotive industry is currently in transition and experiences a huge shift from diesel to gasoline powered vehicles, we would like to showcase that we can make a significant contribution to the drive towards more environmentally friendly and modern mobility. We are focused on offering new and innovative solutions to help all vehicle manufacturers meet stringent emission standards, while still improving performance and fuel efficiency – by using our global experience.

Products and technologies to be showcased

We will be showcasing innovations for all propulsion areas: combustion, hybrid and electric vehicles. All our technologies support energy-efficient and low-emissions mobility. Some of our exhibition highlights include exhaust gas recirculation (EGR) solutions, variable turbine geometry (VTG) turbochargers, our innovative Battery and Cabin Heater families as well as our battery packs.

Expectations from the show

We are looking forward to presenting our technologies on such a big and important platform as the Auto Expo Components. We expect this year’s event to be another very good one, especially as the economic future of India currently looks outstanding and India’s future mobility will be quite a challenge.

BS-VI Impact

BorgWarner fully supports the new BS-VI emission norm in India and, with our existing local testing and validation capabilities, are well positioned to help our Indian customers meet the new requirements with fast-to-market solutions. Therefore, possible changes will have little impact on BorgWarner as we supply efficient propulsion technologies for all types of vehicle. Until 2023, we expect our revenue to grow continuously: 73% CAGR for electric as well as hybrid vehicles technologies and 1% CAGR for the arear of combustion technologies.

NPL to highlight readiness for BS-VI

Hrishikesh Kulkarni, CEO, NPL

Nandan Petrochem Ltd. (NPL) boasts of a wide product range starting from lubricants, greases, transformer oils, white oils / liquid paraffins, rubber process oils and its VELVEX-branded specialty lubricants and AdBlue. Hrishikesh Kulkarni, CEO, NPL, shares his thoughts on Auto Expo 2020, his company's readiness for BS-VI and more.

Focus at Auto Expo 2020

As a company we look forward to Auto Expo wherein our focus will be on promoting our brand VELVEX which caters to aftermarket requirements and showcases NPL's expertise and capabilities to serve the OEM requirements. This show is a good opportunity to highlight our strengths and values and our contribution towards sustainable growth in the automotive industry. Auto Expo is a platform that gives us exposure to the latest market trends, innovations and understanding of the industry drivers. It presents an opportunity to network with potential OEMs for exploring business in the genuine oil domain and also from an aftermarket perspective to leverage our brand VELVEX which has pan-India presence with a strong distribution network of 200+ distributors and 15,000+ retail outlets.

Products and technologies to be showcased

Our product portfolio covers the complete range on engine oils, gear & transmissions fluids, industrial oils & specialty greases, AdBlue (Diesel Exhaust Fluid), process oils, transformer oils and white mineral oils to specialty fluids.

NPL is geared up for the upcoming BS-VI emission norms and we are the largest producer of AdBlue in India today and cater to almost all automotive OEMs.

In the lube domain we would showcase our new generation CK4 engine oils which are compatible for BS-VI engines. This product provides enhanced drain intervals, increased resistance to adhesive wear improving engine durability, better oxidation capacity to handle increased heat load and less scuffing. Since CK4 engine oils are backward compatible for older engines as well, the transition would be much easier. Our CK4 engine oils are already approved with OEMs for their factory fill and aftermarket requirements.

Expectations from the show

We foresee a market revival coming in post April this year; the market sentiments seem to be positive and this Auto Expo will bring in an entire range of new launches – either new variants or completely new models/platforms. India has always been a growing market and we anticipate new global entrants to come in.

On the aftermarket side, the vehicle parc is ever growing and we have done the necessary ground work for our VELVEX brand by providing the market a reliable product at optimum price levels with excellent availability. Through this show we intend to create further traction for our growth in terms of increasing our market reach, tapping new business partners and improve brand visibility with the end consumers.

TEXSPIN to welcome customers with innovation

TEXSPIN has carved a niche for itself as one of the leading providers of cutting-edge technology solutions for the automotive industry. The company has been known for its classy-looking Lounge setup in the Bearings Pavilion since the last few Auto Expos and is gearing up for another eye-catching display, as confirmed by Dipen Makwana, Managing Director, TEXSPIN, in a quick chat.

Focus at Auto Expo 2020

Over the last few Auto Expo shows, TEXSPIN has had a sizeable presence with a lounge concept where our customers and guests could have a relaxed and comforting environment for informal discussions and sharing ideas. We consider the Auto Expo as our biennial customer meeting place where we look forward to welcoming and meeting our customers. Of course, we also do use the Expo to showcase the various new technologies we are working on and try to get feedback from our customers of their perspective and willingness to adopt these technologies. Brand TEXSPIN has been growing in stature over the years and we consider Auto Expo as an important platform for effective communication about our brand attributes and our commitment to our core philosophy of being a technology solution provider to the industry.

Products and technologies to be showcased

We have been focusing a lot on the wheel-end solutions, transmission & differential solutions and of course our core

Dipen Makwana, Managing Director, TEXSPIN

segment of clutch release bearings over the last few years. We would be showcasing all these technologies this year. Since the last Auto Expo, we have received a number of patents such as the hydro pneumatic CSC, zero drop kingpin assembly, stamped futec synchronizers, stamped one-way clutch as well as new technology solutions like the pinion pack, wheel-end modules etc., all of which will all be on display at the TEXSPIN Lounge.

BS-VI Impact

The shift to BS-VI from BS-IV in such a short timeline is a great achievement for the Indian automotive industry and both the vehicle makers and component suppliers

deserve huge appreciation for the commendable effort. It is a great move towards ensuring reduced air pollution which is a matter of major concern today. Having said that, we do expect some challenges both in terms of stabilizing the technology as well as passing on the commercial impact due to the change which may affect the demand scenario temporarily. The automotive demand is already greatly subdued and the market demand is at one of its lowest in several decades and therefore we do not expect any further major downturn in demand from here. However, the revival of the demand from hereon will be further delayed due to this changeover and therefore we need to prepare for a slightly longer depressed demand scenario.

Light that exceeds expectations

Upgrade your headlights with NIGHT BREAKER® families

Traffic is getting heavier all the time, also at night. Anyone who can see and be seen better than others obviously has a clear advantage. So it's hardly surprising that more and more drivers are relying on performance vehicle lamps from the NIGHT BREAKER® families. More light makes it possible to see further. And you arrive home safe and sound at night. Upgrade your lamps now – for a safer journey through the night.

Light is OSRAM

OSRAM
